

# Adobe Muse - Adobe Edge Animate & Adobe Edge Reflow: Integration & support

---

I was wondering the reason behind the introduction of Adobe edge reflow? But if it becomes necessary to have this tool , how does it fit into Muse or how can Muse designers benefit from it. Are we going to subscribe to Adobe Edge Reflow separately? From my opinion I believe Adobe Edge Reflow concept should be integrated into Adobe Muse, since we are yet to see support for adaptive layout and mobile in Muse when other Adobe tools like Adobe edge animate and yet to be introduced Adobe Edge Reflow are already blazing with the such features. What do you think?
