

Contact Form Widget Radio Buttons & Drop Down

Hi all,

I was so pleased to see that the Adobe Muse team added a 'Contact Form Widget' in Muse a few months back. This is a real thumbs up, by probably everyone that uses Muse, however there are a couple additional extras needed to make it amazing.

1. Add radio buttons
2. Add drop down field selection

Everyone keeps on saying that Jotform is 'absolutely amazing' when it comes to forms and that all you have to do is embed the html code into Muse (granted it is clever), but the overall design is not great from a designers point of view and destroys the visual impact of what we are trying achieve.

The Muse contact Form is customisable allowing the form fields to be moved around etc and is unique and stunning.

Is there any plans in the near future to add any more fields to the 'Contact Form Widget' and hopefully when?

Thanks guys!

Richard
