

Multilingual websites

[BertienBoon](#), put it this way:

Aug 11, 2012 3:34 AM

[...] for me this is a huge issue with adobe muse. Perhaps in the US a multilingual site seems farfetched, but when you live in a multilingual country it is essential to have a straightforward solution for this.

I would suggest adobe implements something like a translate button on every piece of text, and then after exporting creates the site in all languages.
