

Add option to upload site to SFTP host - SSH File Transfer Protocol

******I applied an EDIT to this idea, so no need to reply again if you already have ******

Adobe Muse give us the option to upload our site to an FTP host, but not to an SFTP host - SSH File Transfer Protocol. Had I not discovered a work around, using Adobe Dreamweaver, I would have been unable to use Adobe Muse a very long time ago. Adobe Dreamweaver provides an option to upload to and SFTP host. It would help many of us if we could get this same option within Adobe Muse. Given the ever increasing use of technology and the need for more secure systems, it seems logical that SFTP will be used more and more over time. Thank you!
