

# Bug: Passed Paramaters

---

## Previos Page:

```
{module_webapp reclay="myvalue"}
```

## Layout:

```
{{params.reclay}}  
{% if params.reclay == 'list' -%}  
  list  
{% else -%}  
  grid  
{% endif -%}
```

There seems to be a rendering engine bug, it will only ever render "grid" even when the value is list. BC does not seem to be able to understand a passed paramater, I think there is a miss-timing with the rendering maybe? The if runs before it fetches the passed parameters?
