

Utilities

Our web designer has quit.
He used a MAC.
New web designer use Windows 10
We have the source file. website.muse

But LINKS materials are in the MAC format
and we must change them to PC format, they are a lot.

Old Mac WindowsServer {path} \ marketing
to
{M: new pc WindowsServer path} \ marketing

get website.muse decompress it in directory website
with notepad edit Assets.txt
rename \Volume\marketing to M:\marketing
compress derectory website into website.muse
